GPS Tracking System

What is vehicle tracking and how does it work?

Vehicle tracking involves placing a GPS device in a vehicle. This device gathers information about the location of a vehicle and send it to a central location. A person at the center location can monitor the information to know the exact location of a vehicle at a given time.

GPS:23.585.39585.234
Driver 001-4237-2437
ID:48572:874-9549583
direction: 494-57-12
location: 4975-41-~24

Trips

It takes a while to compute the mileage data. The mileage data of today may still be in computation. It is recommended that you check the data of any previous day(s) to ensure that the data you get are accurate.

Statistical methods : ☐ Details ☒ Day Trips with zero mileage : ☒ Do not filter ☐ Filter
